WORK EXPERIENCE

Aristotle Capital Management

June - Aug 2024

Cybersecurity Intern

Los Angeles, CA

Served as key cybersecurity analyst supporting enterprise security operations & risk management initiatives for investment management firm, working directly with executive leadership on strategic defense programs & regulatory compliance efforts.

- Led comprehensive rollout of Exabeam SIEM to 30-person IT department, conducting risk assessments for IT systems and delivering detailed walkthroughs highlighting impact on threat detection and incident response
 - More than 100+ alert parameters analyzed and fine-tuned to reduce false positives
- Collaborated directly with CTO, CFO, and cybersecurity team on strategic defense initiatives and cybersecurity governance, including engagement with U.S. Secret Service Cyber Fraud Task Force
- Produced admin documentation, training materials, and compliance evidence to support internal adoption of Microsoft Copilot in early-stage AI security initiatives and audit readiness
 - Trained 40+ staff members in secure generative AI usage within two weeks
- Assisted in deploying firmwide phishing awareness training, ensuring 100% staff completion within one week

USC Libraries

Nov 2021 - May 2025

Facilities Student Worker

Los Angeles, CA

Provided operational support, process automation for multi-departmental university library system, managing security protocols, access controls, developed automated solutions to streamline administrative workflows & compliance reporting.

- Managed 20–30 maintenance tickets per week across 10 departments, tracking progress on open issues and maintaining centralized documentation
- Automated monthly access control audit of 6,000+ entries using Excel and Google Workspace
- Built JavaScript-based scheduling tool converting Google Form responses to Google Calendar reservations
 - Manages 100+ monthly vehicle bookings, achieved 100% user adoption within 30 days, zero reported usability issues in last 6 months

PROJECTS (parkdj.com/blog)

Home Lab — Vulnerability Assessment & Security Operations

July 2025 - present

Developed comprehensive cybersecurity testing environment to practice vulnerability assessment, incident response, and security operations center (SOC) procedures, simulating real-world enterprise security scenarios.

- Conducted systematic risk assessments and vulnerability scans across multiple VM environments using nmap and Tenable Nessus, maintaining centralized risk register documentation
 - Produced comprehensive vulnerability assessment report documenting 45+ security findings with prioritized remediation strategies
- Deployed and configured Splunk Enterprise on Red Hat Enterprise Linux for advanced security analytics, threat hunting, and SIEM tuning using BOTSv3 dataset
 - Developed proficiency in dashboard creation and key risk indicator (KRI) tracking

EDUCATION

University of Southern California (USC) — *Cum laude*

May 2025

Bachelor of Arts, Applied & Computational Mathematics, Minor in Cybersecurity

- Relevant Coursework: Cybersecurity Management & Operations ([constructed ISMS](#)), Intro to Ethical Hacking
- Served 5 semesters at campus newspaper with 2 semesters as Digital Managing Editor, overseeing 5 digital-media sections

CERTIFICATIONS: CompTIA Security+ | *Valid until Sep. 2027*; Splunk Core Certified User | *Valid until July 2028*
